

## Seven Tube Light

Hanging Version

detail: top part

detail: bottom part

Using industrially produced fluorescent glass tubes arranged in a cluster, this chandelier is illuminated only by the single bulb at its center. By surrounding the inner lamp with unlit tubes, the emitted light is softened as it passes through each layer of glass. Machined from solid brass, each cap securely holds the assembly. Finished with a hand applied patina, the brass is left to age based on conditions of its environment. This light is also available in a floor version.

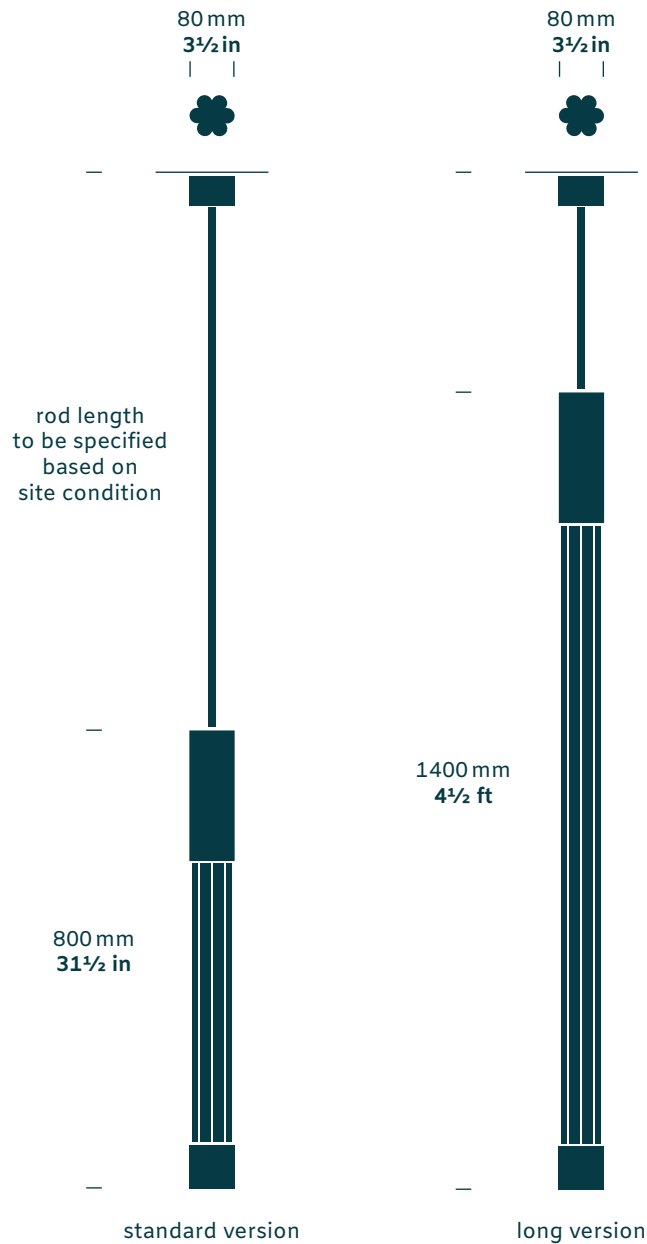

# Seven Tube Light

Hanging Version

casegoods

## Dimensions

## Material

**Body** Brass  
**Finish** Aged

## Care

We find beauty in the marks of unique character, subtle variations of grain, figure, and texture inherent in materials that deepen through use and patinate over time.

**Brass:** The brass can be polished when desired with any brass cleaning agent to recover its original shiny gold look. However, we recommend it be left to age naturally.

## Assembly Instructions

The overall height of the light will be adjusted to fit the space it's installed in. The Casegoods team needs to be contacted in order to specify the rod length. This light requires professional electrical services to be installed.

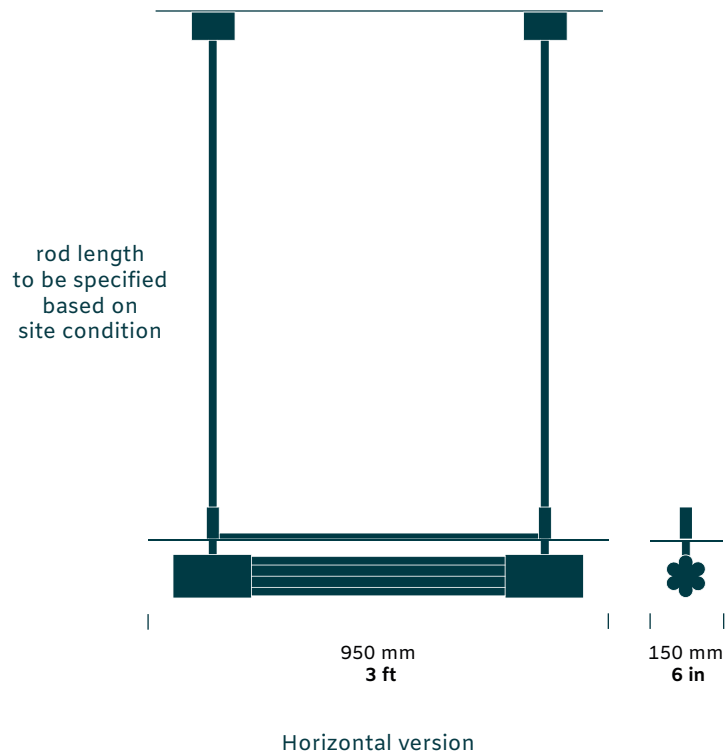

## Electrical Specifications

Light: Philips T8 Trulite Fluo Lamp - warm white  
2ft or 4ft length, 18W – 13000 lumens – 220 / 240V

Using industrially produced fluorescent glass tubes arranged in a cluster, this lamp is illuminated only by the single bulb at its center. By surrounding the inner lamp with unlit tubes, the emitted light is softened as it passes through each layer of glass. Machined from solid brass, each cap securely holds the assembly which is held at the base by a carefully crafted piece of marble. Finished with a hand applied patina, the brass is left to age based on conditions of its environment. This light is also available in a hanging version.
