

Created to maintain precision while making, these blocks are both tool and toy for active imaginations. Each brass piece is machine milled and part of an organized system of basic units. Used to cut, mark, measure, and press, they make work not just easier but better. When not in use, the five individual pieces slip into fitted slots cut into the wooden block, completing the ensemble.

Brass Aged

Care

We find beauty in the marks of unique character, subtle variations of grain, figure, and texture inherent in materials that deepen through use and patinate over time.

Oiled wood: Wipe regularly with a dry cotton cloth. Clean as required with a mild detergent specific for wood. Periodically apply a generous coat of coconut oil with a clean cotton cloth. Let it soak in for an hour, then wipe off the excess with a clean cotton cloth.

Brass: The brass blocks can be semi-regularly polished with any brass cleaning agent to recover its original shiny gold look. However, we recommend it be left to age naturally.
